**One time half- day**

**1. how to handle suicidal ideation.**

Suicidal feelings are more common than we realize. Not a symptom of disease, the urge to die is often a desperate need for change conflicting with an overwhelming sense of powerlessness. How can we support others – and respond to these feelings in ourselves?

Discover latest research, hear about innovative practices, and learn useful tools. Clinicians, students, people who have struggled with suicidal feelings, and family/friends are welcome.
